The proposed project would involve expanding the width of the existing Rockride Lane right-of-way from 80 feet to 87 feet. The existing roadway is a two-lane minor arterial roadway. The proposed project limits are from Sam Houston Avenue to north of Carlson Cove, just southeast of the Southeast Inner Loop. The proposed project is 0.8 miles long with 8.9 acres of existing right-of-way and 2.6 acres of proposed right-of-way. Improvements are proposed within the existing and proposed right-of-way.

Proposed roadway improvement tasks include the widening of existing travel lanes from 11 feet to 12 feet, the addition of a 10-foot-wide two-way turn lane between the two north-south travel lanes, and the addition of a 10-foot-wide shared-use path along the eastern side of Rockride Lane.
